PROFESSIONAL SUMMARY

A seasoned Application Service Delivery and Technology Leader with 19+ years of deep expertise in the FinTech sector. Most recently served as a VP at Citi, managing end-to-end delivery for Consumer Finance & Wealth Management systems serving 10M+ users across 16+ markets. Expert in balancing agile feature delivery with production stability, regulatory adherence, and architectural modernization. Proven track record in managing cross-border teams to deliver operational excellence, business growth and measurable outcomes.

CORE COMPETENCIES

- **Consumer Finance Delivery:** Orchestrated end-to-end delivery of Credit Card & Unsecured Lending applications across 16+ markets, mastering cross-border financial system operational logic and regulatory compliance.
- **Cloud-Native Architecture:** Led strategic Monolith-to-Microservices migration on Private Cloud (OpenShift/Docker) using Java/Spring and Angular, enhancing scalability.
- **Production Stability & SRE:** Championed SRE best practices to maintain high system availability and minimize production risks.
- **SDLC & Budget Oversight:** Proficient in supervising full SDLC implementation to meet enterprise standards; collaborated on project budgeting and resource allocation, optimizing cost-efficiency.
- **Global Leadership:** Built and scaled a 90+ member delivery center; excelled in managing cross-border teams within a matrix organization.
- **Regulatory & Risk Compliance:** Expert in navigating financial regulations and driving "Safety & Soundness" initiatives to ensure effective risk mitigation and operational compliance.
- **Stakeholder Management:** Adept at bridging Business and Technology gaps, managing executive expectations, and securing resources for critical projects.

WORK EXPERIENCE

Citigroup Services and Technology (China) Limited (CSTC)

May 2006 – Sep 2025

VP (Engineering Lead / Dalian Site Manager) | Retail & Wealth Management Digital Technology Unit

Strategic Business Impact

As Tech Owner, led a globally distributed team to deliver end-to-end Consumer Finance and Digital Banking solutions, driving substantial business growth for a user base of over 10 million.

- **Global Scale & Efficiency:** Supported 16+ global markets, serving 10M+ users (6M+ MAU); spearheaded digital migration of 100+ Credit Card and Unsecured Lending functions, achieving a 90%+ user self-service rate.
- **Revenue Growth:** Generated tens of millions of USD in monthly revenue through key product features (Installments, Loans, PayAll), scaling monthly installment transaction volume by 100x.
- **Budget & Resource Optimization:** Collaborated with project sponsors on project budgeting and cost control, ensuring resource alignment with business priorities and optimizing overall project investment returns.
- **Operational Resilience:** Oversaw "Safety & Soundness" initiatives across 40+ applications, ensuring system stability and compliance by reducing high-risk vulnerabilities by 70% and continuously lowering technical debt.

Technology Leadership & Architectural Evolution

As a technical expert, drove major architecture modernization and engineering transformation to maximize delivery reliability and business agility.

- **Microservices Transformation:** Migrated legacy Struts/Spring monolith to a modern Microservices architecture (Spring Boot/Cloud) with Angular frontend, significantly improving system scalability and deployment velocity.
- **DevSecOps Implementation:** Drove adoption of CI/CD pipelines on enterprise private cloud (OpenShift/Docker), ensuring standardized and secure software delivery cycles.
- **SDLC Governance:** Supervised full SDLC implementation (requirements analysis, solution design, construction, testing, deployment, production support) across all supported applications, ensuring adherence to enterprise technical standards and regulatory compliance.
- **Cost Efficiency:** Designed and implemented a common codebase with a flexible configuration engine, reducing development costs by over 50% while maintaining architectural consistency across regions.
- **Engineering Productivity:** Cultivated a culture of innovation and efficiency, leading to the development of internal tools (PSG Portal) and leveraging AI (Copilot) to accelerate technical upgrades.

High-Performance Team & Talent Development

As a team enabler, focused on fostering team growth to build a high-performance delivery center.

- Team Scaling: Successfully built the Dalian technology team from the ground up (0 to 90+ members), establishing it as a key delivery hub.
- Matrix Leadership: Led cross-regional project teams of 20+ professionals across Dalian, Shanghai, India, and Singapore. Proven ability to align delivery goals with Global/Regional strategies while managing career development and performance.
- Talent Pipeline: Fostered a culture of continuous learning by organizing tech talks and Hackathons, successfully grooming multiple key technical experts and ensuring succession planning.

Site Operations & Governance (Dalian Site Manager)

As Site Manager, ensured efficient, compliant, and secure operations for the Dalian team.

- Risk & Control: Oversaw all aspects of Operational Risk and Governance for the Dalian site, ensuring adherence to internal controls, information security standards, and passing internal audits.
- Resource Management: Partnered with HR, vendors, and IT to drive talent acquisition and resource management, ensuring stable staffing for critical projects.
- Culture Building: Conducted initiatives to foster a positive, collaborative culture, ensuring high team retention and engagement.

Camelot Inc.

Jan 2004 - Mar 2006

Software Development Engineer

- Participated in the system development for projects related to Nissan Motor, responsible for core modules coding and unit testing.

JCC Inc.

Jul 2002 - Jan 2004

Software Development Engineer

- Engaged in system development for projects related to Panasonic, responsible for coding and unit testing.

EDUCATION

Taiyuan University of Technology

Graduated 2002

Bachelor's Degree in Computer Science and Technology
